

William C. Dawn
CURRICULUM VITAE — OCTOBER 2026

CONTACT INFORMATION

E-mail: wdawn730@gmail.com	GitHub: @wcdawn	Address: 224 12 th Street Idaho Falls, ID 83404
Cell: (208) 471-7968	Website: wcdawn.github.io	

EDUCATION

North Carolina State University, Ph.D. Nuclear Engineering 2022
Dissertation: *Multiphysics Modeling of Microreactors with Unstructured Mesh Neutron Transport and Exascale Computing Architectures*.
Advisor: Scott Palmtag.

North Carolina State University, M.S. Nuclear Engineering 2019
Thesis: *Simulation of Fast Reactors with the Finite Element Method and Multiphysics Models*.
Advisor: Scott Palmtag.

North Carolina State University, B.S. Nuclear Engineering 2017

RESEARCH EXPERIENCE

Idaho National Laboratory, Idaho Falls, ID 2026–Present
Computational Scientist. Computational Frameworks.
Leading reactor physics modeling for autonomous control of TRIGA reactor. Developer of FEM software.

Idaho National Laboratory, Idaho Falls, ID Summer 2019
Graduate Research Assistant. Reactor Physics Modeling & Simulation.
Added ISOTXS and MC²-3 interface to Griffin. Analyzed anisotropic scattering in fast reactors.

Oak Ridge National Laboratory, Oak Ridge, TN Summer 2017
Graduate Research Assistant. Reactor Multiphysics.
Used MC²-3 and ISOTXS file reader to analyze Molten Chloride Fast Reactor (MCFR) with MPACT.

Consortium for Advanced Simulation of LWRs (CASL), Raleigh, NC 2016–2019
Undergraduate & Graduate Research Scholar. Physics Integration.
Verification & Validation of MPACT cross sections. Runtime improvements of CTF steam tables.

North Carolina State University, Raleigh, NC 2017–2022
Graduate Student. Nuclear Engineering University Program (NEUP) Fellow.

PROFESSIONAL EXPERIENCE

Studsvik Scandpower, Inc., Idaho Falls, ID 2022–2026
Senior Nuclear Engineer. Methods.
Lead developer of new Peacock Monte Carlo code.
Developer for CASMO/SIMULATE with an emphasis on transient analysis.

GE Hitachi Nuclear Americas, LLC, Wilmington, NC Summer 2015 & 2016
Edison Engineering Intern. LOCA & Containment. PRISM.
LOCA analysis with TRACG. Sodium cold trap design for PRISM.

NCSU PULSTAR Reactor, Raleigh, NC 2014–2017
Reactor Operator. Nuclear Reactor Program.
Licensed by U.S. NRC to operate 1 MW pool-type research reactor.

TEACHING EXPERIENCE

- University of Idaho**, Nuclear Engineering & Industrial Management Dept. Fall 2026
Nuclear Criticality Safety — NE 5350
Instructor of record. Graduate course. Hybrid format. Developed syllabus, homework, and projects.
- Idaho National Laboratory** August 5, 2026
Nuclear 101
Developed and delivered introductory course for non-nuclear engineers.
- North Carolina State University**, Nuclear Engineering Dept. Fall 2019
Fundamentals of Nuclear Engineering — NE 301
Guest lecturer. Undergraduate course. Lectures on neutron diffusion, depletion, and xenon.
-

MENTORING EXPERIENCE

- University of Michigan**, Ann Arbor, MI September 2026–Present
Working with Prof. Brendan Kocuhunas advising a student researching FEM and GSP_N.
- Idaho National Laboratory**, Idaho Falls, ID Summer 2026
Mentored graduate student intern resulting in conference paper submission.
- Studsvik Scandpower, Inc.**, Idaho Falls, ID Summer 2024 & 2025
Re-established internship program. Mentored interns resulting in four conference papers.
- North Carolina State University**, Raleigh, NC 2020–Present
Developed LUPINE multi-physics suite for SFRs. Mentor students continuing to develop LUPINE.
-

REFEREED JOURNAL ARTICLES

- [1] **William C. Dawn**, Charles Wemple, Tung D. C. Nguyen, Joshua Hykes, Petri Forslund Guimarães, and Rodolfo M. Ferrer. “Peacock: A Monte Carlo Code for Reactor Physics.” In: *Nuclear Science and Engineering* (2026). Accepted.

- [33] James P. Sineath, Dean D. Molinaro, **William C. Dawn**, and Eric P. Loewen. “Systems and Methods for Airflow Control in Reactor Passive Decay Heat Removal.” Pat. US10937557B2 (Wilmington, NC). Mar. 2021.

SELECTED INVITED TALKS

North Carolina State University, Nuclear Engineering Dept. — Raleigh, NC September 10, 2026
Seminar. “Autonomous Operations of NRAD.”
American Nuclear Society, Summer Conference — Chicago, IL June 16, 2025
Panelist. Roundtable on Current Issues in Computational Methods. Topic: “Side Projects that Took Off.”

TECHNICAL SKILLS

Languages C++, Fortran, C, Python, MATLAB, Bash, $\LaTeX$
Simulation Packages CASMO, SIMULATE, MFEM, MOOSE, OpenMC, MCNP, Serpent, MPACT, CTF, VERA, DIF3D, MC²-3, REBUS
General Proficiencies Git, GitHub, GitLab, HDF5, Make, CMake

HONORS & AWARDS

American Nuclear Society — Alan F. Henry/Paul A. Greebler Graduate Scholarship 2021
U.S. Department of Energy — NEUP Graduate Fellowship 2017–2020
North Carolina State University — College of Engineering Master’s Scholar of the Year 2019
U.S. Department of Energy — NEUP Undergraduate Scholarship 2014–2017
American Nuclear Society — Undergraduate Scholarship 2014–2018

SERVICE

American Nuclear Society, Member 2014–Present
Reactor Physics & Mathematics and Computation divisions
Early Career Researchers Association (ECRA) at INL, Member 2026–Present
Cross Section Evaluation Working Group (CSEWG), Member 2025–Present
Annals of Nuclear Energy, Referee 2022–Present
Nuclear Science and Engineering, Referee 2022–Present
Nuclear Engineering and Design, Referee 2022–Present
